Subject: Support of Amended Request for Waiver of §90.531(b)(2)

Reference: Request for Waiver of WMATA – PS Docket 13-87

To whom it may concern:

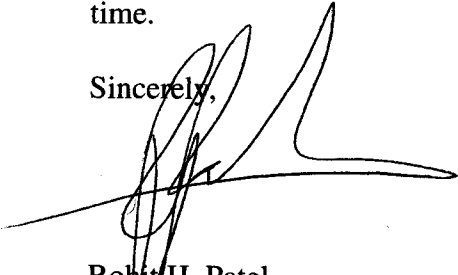

I am submitting this letter on behalf of Intellect Corporation (Intellect) in support of the Washington Metropolitan Area Transit Authority (WMATA), and its request for an Amended Request of Waiver of §90.531(b)(2) to obtain licenses for 16 (12.5 KHz) frequencies within the 700-MHz reserved channels identified in §90.531(b)(2).

Intellect Corporation is an industry leader in telecommunications, and in particular, subterranean communications networks. We have worked with and continue to work with WMATA on the engineering, implementation, and maintenance of two-way radio communications systems. We have seen firsthand the importance of WMATA getting the additional spectrum. The Federal Communications Commission's grant of requested frequencies by WMATA will be highly beneficial for the general public, public safety agencies including first responders, and, essential for operations and maintenance. It is critical that WMATA's request for permission to build upon the existing Metro infrastructure is approved

As a business owner, user of mass transit, and with a vested interest in WMATA's success, I urge you approve WMATA's request for 16 (12.5 KHz) frequencies for communications.

Should you have any further questions regarding this matter, please do not hesitate to contact me at any time.

Sincerely,

Rohit H. Patel
